

Improving Environmental Cleaning and Disinfection: Working on the front lines

March 26, 2008, 11:00 am-12:00 Noon – Audio Conference

The Coalition is hosting an educational session on Improving Environmental Cleaning and Disinfection. Effective infection prevention and control and disinfection require everyone's involvement. Join us to hear two different approaches to engaging the environmental cleaning staff for greater effectiveness.

The Veterans Administration Hospital in Pittsburg, PA, will share the improvements they achieved by including environmental services staff in a hospital-wide MRSA prevention campaign, and the unique strategies that the front line staff brought to the program.

Philip C. Carling, M.D., Director of Infectious Diseases and Hospital Epidemiology at Carney Hospital and faculty of Boston University School of Medicine. will share lessons from his studies of environmental cleaning and feedback strategies.

Topics include:

- Product and cleaning strategy selection
- Successful teambuilding strategies
- Appropriate use of feedback and education
- Using your front line experts to identify solutions

Who should attend this call?

Quality leaders, infection control professionals, environmental services managers/supervisors

To get the Most from this call:

Bring your own success stories, questions, and challenges.
Come as a team, and be prepared for a future of creative problem solving and front line ownership.
