

## Root Cause Analysis and Action Plan

| <u>Level of Analysis</u>  |   | <u>Questions</u>  | <u>Findings</u> | <u>Root Cause?</u> | <u>Take Action?</u> |
|---|---|---|-----------------|--------------------|---------------------|
| What Happened?  | Sentinel event                                      | What are the details of the event?<br>(Brief description)                               |                 |                    |                     |
|   |   | Did the event pose an immediate danger to patients or staff?                            |                 |                    |                     |
|   |   | When did the event occur?<br>(Date, day of week, time)                                  |                 |                    |                     |
|   |   | What area/service was impacted?   |                 |                    |                     |
|   |   | What areas/services/departments are participating in the root cause analysis?           |                 |                    |                     |
| Why did it happen?<br><br>What were the most proximate factors?<br>(typically "special cause" variations) | The process or activity in which the event occurred | What are the steps in the process, as designed?<br>(A flow diagram may be helpful here) |                 |                    |                     |
|   |   | What steps were involved in (contributed to) the event?                                 |                 |                    |                     |
|   | Human factors                                       | What human factors were relevant to the outcome?  |                 |                    |                     |
|   | Organizational factors                              | What organizational factors are relevant to the outcome?                                |                 |                    |                     |
|   | Equipment factors                                   | How did the equipment performance affect the outcome?                                   |                 |                    |                     |
|   | Controllable environmental factors                  | What factors directly affected the outcome?   |                 |                    |                     |
|   | Uncontrollable external factors                     | Are they truly beyond the organization's control?                                       |                 |                    |                     |
|   | Other   | Are there any other factors that have directly influenced this outcome?                 |                 |                    |                     |
|   |   | What other areas or services are impacted?  |                 |                    |                     |

| <u>Level of Analysis</u>   |                                 | <u>Questions</u>   | <u>Findings</u> | <u>Root Cause?</u> | <u>Take Action?</u> |
|--|---------------------------------|--|-----------------|--------------------|---------------------|
| <b>Why did that happen?<br/>What systems and processes underline those proximate factors?</b><br><br>(Common cause variation here may lead to special cause variation in dependent processes.) | Human resource issues           | To what degree are staff properly qualified and currently competent for their responsibilities?        |                 |                    |                     |
|  |                                 | How did actual staffing compare with ideal levels?   |                 |                    |                     |
|  |                                 | What are the plans for dealing with contingencies that would tend to reduce effective staffing levels? |                 |                    |                     |
|  |                                 | To what degree is staff performance in the operant process(es) addressed?                              |                 |                    |                     |
|  |                                 | Was there a knowing violation of policies or procedure?  |                 |                    |                     |
|  |                                 | Were any unauthorized substances in use or suspected?  |                 |                    |                     |
|  | Information management issues   | To what degree is all necessary information available when needed? accurate? complete? unambiguous?    |                 |                    |                     |
|  |                                 | To what degree is communication among participants adequate?   |                 |                    |                     |
|  | Environmental management issues | To what degree was the physical environment appropriate for the processes being carried out?           |                 |                    |                     |
|  | Uncontrollable factors          | What can be done to protect against the effects of these uncontrollable factors?                       |                 |                    |                     |

|   | <u>Risk Reduction Strategies</u> | <u>Responsibility</u> | <u>Date</u> | <u>Measures of Effectiveness</u> |
|---|----------------------------------|-----------------------|-------------|----------------------------------|
| For each of the findings identified in the analysis as needing an action, indicate the planned action, expected implementation date, and associated measures of effectiveness, OR . . . |                                  |                       |             |                                  |
| If, after consideration of such a finding, a decision is made not to implement an associated risk reduction strategy, indicate the rationale for not taking action at this time.        |                                  |                       |             |                                  |
| Check to be sure that the selected measure will provide data that will permit assessment of the effectiveness of the action.  |                                  |                       |             |                                  |
| Consider whether pilot testing of a planned improvement should be conducted.  |                                  |                       |             |                                  |
| Improvements to reduce risk should ultimately be implemented in all areas where applicable, not just where the event occurred. Identify where the improvements will be implemented.     |                                  |                       |             |                                  |
| <b>Cite any books or journals articles that were considered in developing this analysis and action plan:</b>  |                                  |                       |             |                                  |
